

CHARLTON NEIGHBOURHOOD HOUSE

STRATEGIC PLAN

2022-2025

“We are confident that our new strategic plan is heading in the right direction for the development of the Charlton community, by bringing the future needs, into the present, so we can address them. Together with our partners we will build a stronger, sustainable community.”

Charlton Neighbourhood House Strategic Plan 2022-2025

This document contains strategies and plans that the Charlton Neighbourhood House intends to deliver with their partners against the UN's Sustainable Development Goals (SDGs) over the next 3 years. This will be achieved by alignment to the locally identified community development goals.

Background

United Nations Sustainable Development Goals

The United Nations Sustainable Development Goals (SDGs) are a set of global principles to guide action. Seventeen goals sit atop 169 detailed global targets and an emerging set of indicators. Adopted in 2015 by Nations including Australia, they were designed with national governments in mind and are a voluntary agreement among the United Nations' 193 member states. All member states agree on the intent behind the goals to address common global issues.

The SDGs can also be used by local governments and non-government organisations. While there are global targets sitting underneath each goal – the SDGs can be localised to address specific issues that are relevant in a local context that work to contribute to the global effort.

There are no mandatory requirements for explicitly stating a level of commitment, minimum agreed targets, ongoing compliance or performance reporting imposed by the United Nations. This means the Charlton Neighbourhood House does not need to commit to all of the goals or any of the global targets, they are a guide - an organisation can align one or more SDGs to local issues and choose relevant targets, use varying means of implementation and indicators to monitor and measure (localisation) to help progress the global effort articulated in the goals.

Localisation example 1: SDG 2 Zero Hunger - Obesity is the flipside of hunger. Addressing obesity is just as relevant as addressing hunger in the Charlton context. For example, Charlton have 25% of the population not involved in physical activity and 44% of the population are obese. Charlton is located in the Buloke Shire which has higher rates of Cardio Vascular diseases, Diabetes, Musculoskeletal diseases and respiratory diseases than the average Victorian rates. (ABS data 2016) Obesity would be a localised example of SDG3 Good Health and Wellbeing also.

Localisation example 2: The Charlton Neighbourhood House decision to support community group Charlton Landcare localises SDG11 Sustainable Cities and Communities; SDG 13 Climate Action; SDG14 Life Below Water; SDG 15 Life on Land; and 17 Partnerships for Goals.

The SDGs can be utilised by organisations, as a practical global reference point to think holistically about sustainable development, while providing a common language to engage and communicate with people to enact positive change.

Method

Charlton Neighbourhood House addressed three main questions as part of this planning process.

Do Charlton Neighbourhood House's strategies and plans align with the SDGs?

The SDGs were mapped against each of the Charlton Neighbourhood House's strategies and plans to assess current delivery and connection. The Charlton Neighbourhood House's strategies and plans were also then mapped against all the SDGs to identify gaps and opportunities. This process included an assessment to determine which goals and global targets were relevant to the Charlton Neighbourhood House.

Do Charlton Neighbourhood House's goals align with the SDGs?

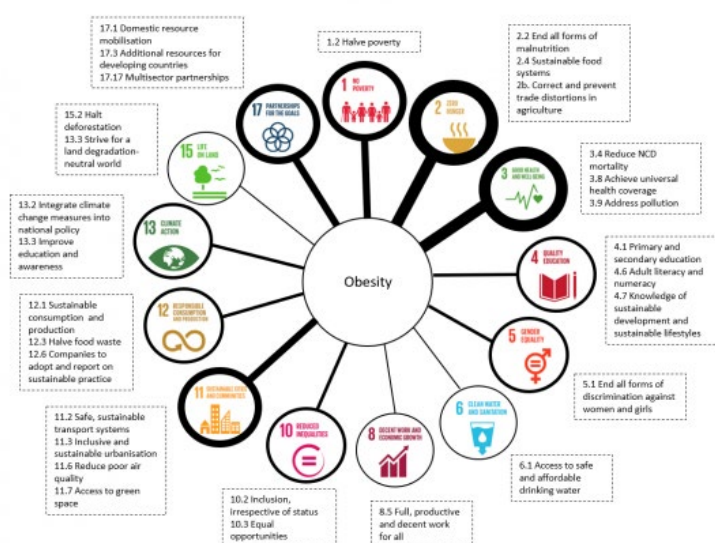

The strategies and plans were grouped under each CNH goal they primarily relate to, as a way to order the assessment of strategies and plans. An internal desktop review by committee and staff considered the assessments and the relevance of the SDG's.

Would the SDGs add value to the Charlton Neighbourhood House's approach to planning, delivery and outcomes over the period of this strategic plan?

The Charlton Neighbourhood House considered how the SDGs could be used, as an overarching framework to shape, steer, communicate and report our strategies, goals and activities. We identified the ways the SDGs could be beneficial to the growth of our organisation and sector. For example, strengthening stakeholder relations through shared purpose and the provision of a common language; and a strategic alignment to the sector body Neighbourhood Houses Victoria.

There were limitations to the desktop assessment. There is no standard approach to SDG utilisation within the sector, community or LGA. Localisation requires no accountable targets, and clear direction in the infancy of incorporating SDGs into the strategic planning process may not capture a comprehensive view of the work undertaken by the Charlton Neighbourhood House. A further complication maybe the underestimation of what SDGs are addressed.

A good example of this is Localisation example 1 above where we identify obesity to aligning with SDG 2 Zero Hunger and SDG 3 Good Health and Wellbeing only, health professionals align obesity with all 17 SDG's, with varying levels of direct association.

Findings

What are we currently doing, gaps and opportunities.

The desktop assessment determined all 17 SDGs can be aligned with Charlton Neighbourhood House's strategies and plans. There were clearly identified opportunities to develop partnerships to achieve the majority of the community development goals and whilst all 17 SDGs were determined to be high priorities for the Charlton community, a further assessment broke the areas down to High/High, High/Med and High/Low to allow realistic goals to be set.

However, the assessment identified an opportunity to strengthen delivery against four key SDGs identified through the gap analysis for the benefit of the Charlton community:

High/High

End poverty in all its forms everywhere

End hunger, achieve food security and improved nutrition and promote sustainable agriculture

Ensure healthy lives and promote well-being for all at all ages

Strengthen the means of implementation and revitalize the global partnership for sustainable development

The second tier of priorities identified through the analysis: **High/Medium**

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

Achieve gender equality and empower all women and girls

Reduce inequalities within and among countries

Promote sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all

Build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation

The third and final tier, identified: **High/Low**

Ensure availability and sustainable management of water and sanitation for all

Ensure access to affordable, reliable, sustainable and modern energy for all

Make cities and human settlements inclusive, safe, resilient, and sustainable

Ensure sustainable consumption and production patterns

Take urgent action to combat climate change and its impacts

Conserve and sustainably use the oceans, seas and marine resources for sustainable development

Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss

Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

The desktop assessment also revealed there is opportunity for the Charlton Neighbourhood House to integrate multiple Sustainable Development goals and improve sustainable development outcomes through key strategy renewals and CNH practices currently underway or about to commence:

- **Partnerships** for example Charlton Landcare, Charlton Forum, Charlton Chamber of Commerce and Industry, Buloke Shire, East Wimmera Health Service, Buloke Wellbeing and Equity Network, No Interest Loan Scheme, Haven Home Safe, St. Vincent's de Paul, Charlton Community Transport
- **Auspice Groups** for example, Charlton Youth Group, World Action Development Group, 2nd Tuesday Book Club, Tai Chi, Charlton Millenials
- **Social Enterprise** CNH Opportunity Shop
- **Program deliveries**, for example Table for 12, Exercise classes, Connecting Creativity, Youth Space.
- **Activity deliveries**, for example Wear it Purple, RU OK Day, 16 days of activism, Listening Posts
- **Projects** for example Three Walls, John Monash Water Tower, First Nations Art Trail, River/CBD redevelopment, OK Motels

The disruption caused by the coronavirus globally has detrimental setbacks for sustainable development. Measures taken to respond to the crisis by governments will have significant consequences on the economy and our lives for many years. Research indicates the pandemic has exacerbated existing trends pre COVID-19, including higher levels of inequality, poverty, and psychological distress. The lockdowns and counter measures have also resulted in an unprecedented drop in GDP and employment, which has particularly impacted women and lower-income households. Charlton Neighbourhood House will focus on recovery strategies, resilience and long term prosperity during this strategic planning period.

The Charlton community is also exposed to climate change impacts and risks including heat, and extreme weather events, mainly droughts and flooding.

If these issues are not addressed, they will undermine progress against the other goals, in particular affecting those people who are the most vulnerable in our community.

These above identified challenges capturing the first and second tier priorities identified High/High and High/Medium present opportunities to strengthen the Charlton Neighbourhood House's approach to social resilience.

The third tier High/Low predominantly represent supporting Charlton to become a climate ready and responsible community relies very heavily on external partners. The Charlton Neighbourhood House has a key role particularly through our Social Enterprise with managing waste and resource recovery and can influencing responsible consumption through delivery of Responsible Service of Alcohol courses and recycling programs. Consideration of Circular Economy and Social Impact Investing are large considerations in all CNH strategies and planning.

Consideration was given as to how we would use the SDGs, to determine their value for the Charlton Neighbourhood House. It was decided that the SDGs would be used in the following ways, during this planning period:

1. As a sustainable development reference for our day-to-day work;
2. To consider opportunities to align SDGs when developing new organisation-wide approaches;
3. To introduce localisation processes to determine targets and indicators relevant for the Charlton Neighbourhood House and Charlton community; and
4. To provide a global language to enable greater community awareness and to develop shared targets with partners.

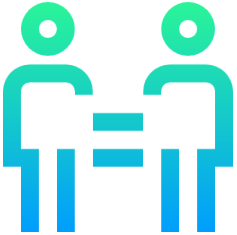

By localizing the SDG's Charlton Neighbourhood House will commit to undertake awareness raising and advocacy for SDG inclusion with our partners, we will implement the SDGs on a local level and will evaluate and learn from our experiences.

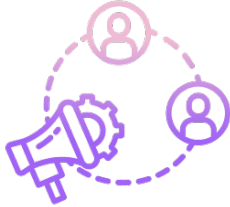

A scorecard of Charlton Neighbourhood Houses current goals and delivery against the SDG's can be found in Appendix 1.

Appendix 1: Charlton Neighbourhood House Scorecard
